What Is Special Education?

A program which helps you to become skilled in working with children who depart from the usual pattern.

"No Two Alike . . ."

Each child is different. Some need the help of special teachers.

Schools Recognize Need

Teachers need special training to fill posts being created to aid these children.

You Learn to Teach:

- The "slow-learning" child.
- The crippled or physically handicapped child.
- The emotionally upset child.
- The fast thinker and learner.

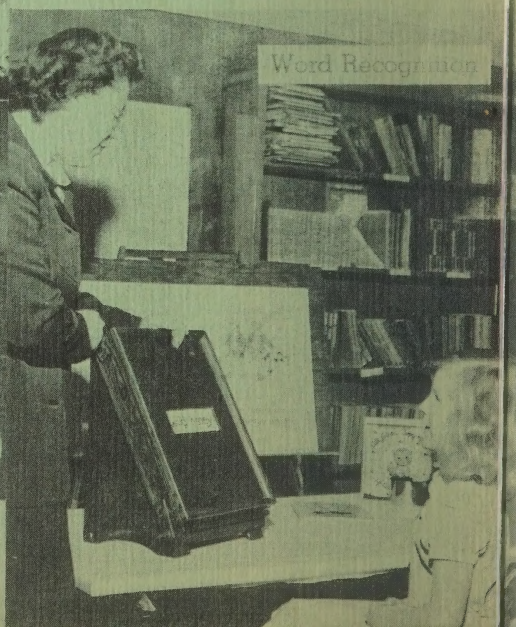

OREGON COLLEGE BULLETIN

Published by Oregon State

NO. 6

Eugene

Entered as second-class matter August 25, 1950, at the post office at Eugene, Oregon, with point of additional entry at Eugene, Oregon. Publication of this bulletin once in September, by the Oregon State Board of Higher Education.

What You Study

Follow the four-year degree program at Oregon College of Education, including the following:

- Special Education
- Child Growth and Development
- Counseling and Guidance
- Speech Correction
- Intelligence Testing
- Corrective Reading Practice
- Problems in Elementary Education
 - a. Reading Laboratory Experiences
 - b. Guidance Laboratory Experiences

Practical Experiences

The Oregon College of Education-Polk County Child Guidance Services afford you a unique opportunity to work directly with children. You collaborate with a psychiatrist, public health doctors and nurses, and Oregon College of Education guidance and reading experts.

How the Guidance Services Operate

They centralize psychiatric, medical, school, testing, and remedial services for the child. Here experts test, consult, and study to find the best ways of aiding the child. As a special-education student, you are a part of this team.

"And So We Learn . . ."

This is the story of Special Education: recognition of the child's need, testing and diagnosis to determine the best approach, and, finally, action to help him develop in his own way.

... And So We Read
